

SUPPLIER UNIFIED TABLE

- 1 Check the unified offer table appears when a paid supplier opens the Offers page. ☐
- 2 Check the table layout is the same for Goods, Works, and Services lines. ☐
- 3 Check Material Price and Service Price fields are editable. ☐
- 4 Check Price (auto) is read-only and always equals Material Price plus Service Price. ☐
- 5 Check Brand, Model/MPN, Manufacturer, Country of Origin, and Datasheet appear in the drilldown for all lines. ☐
- 6 Check attachment upload is always enabled and only accepts PDF files. ☐
- 7 Check switching Applicability to Not Applicable disables text inputs but keeps attachments active. ☐
- 8 Check the Excel export reflects the new table structure including Material Price, Service Price, and Price (auto). ☐
- 9 Check Service Price is disabled and Material Price is enabled for Goods lines. ☐
- 10 Check Brand, Model/MPN, Manufacturer, and Country of Origin are mandatory for Goods lines unless Applicability is Generic. ☐
- 11 Check Material Price and Service Price are both enabled for Works and Services lines by default. ☐
- 12 Check Service Price is always mandatory for Works and Services lines. ☐
- 13 Check entering Material Price for Works or Services lines makes Brand, Model/MPN, Manufacturer, Country of Origin, and Datasheet m ☐
- 14 Check field mandatory states update immediately when Applicability is toggled on or off. ☐
- 15 Check Material Price and Service Price fields accept only numeric values. ☐
- 16 Check Price (auto) cannot be manually edited. ☐
- 17 Check the supplier can switch Applicability on and off multiple times while the offer is in draft. ☐
- 18 Check the unified offer table loads correctly and performs well with a large number of lines. ☐
